Floor Guide

English

Be Curious!

Be Curious at Space LABO!

There are many points of curiosity and wonder in our town and daily lifestyles that we often do not notice. Curiosity is the door into the world of science.

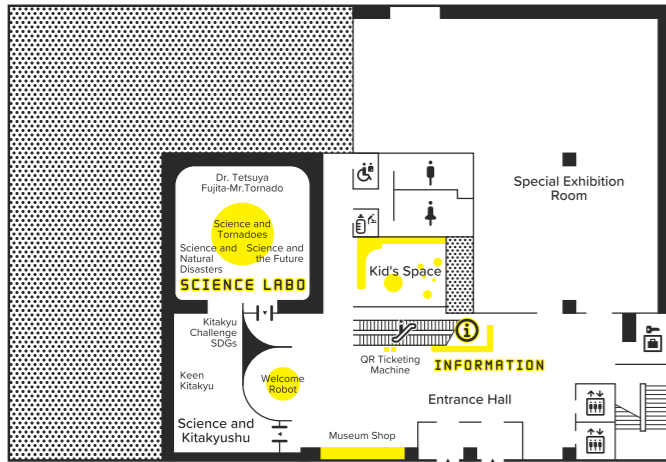

Curiosities of the City, Curiosities of Life, Curiosities of the Heart.

Space LABO is a science museum where every individual's sprout of curiosity is gently nurtured through experience and sensation.

www.kitakyushuspacelabo.jp

SCIENCE LABO 1F

The first floor is an exhibition with the theme of Kitakyushu and science.

Science and Kitakyushu

There are many wonders of science in our city, Kitakyushu. Let's find out about them.

Keen Kitakyushu

Science and Natural Disasters

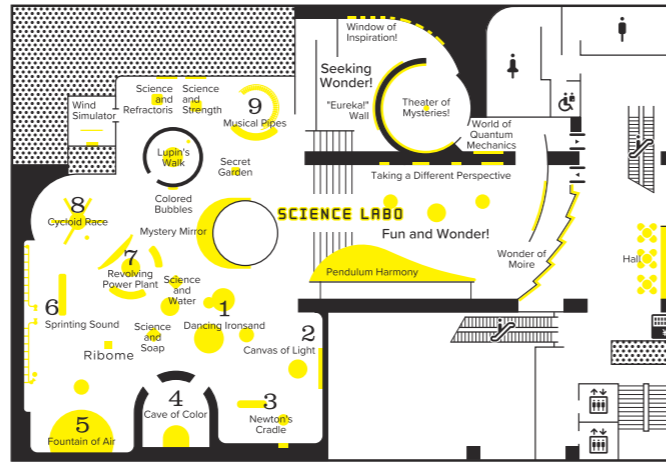

Science and Tornadoes

Dr. Tetsuya Fujita-Mr. Tornado

SCIENCE LABO 2F

The second floor is an exhibition room with the theme of mysterious and fun scientific phenomena.

Fun and Wonder!

Enjoy the fun of science by experiencing its wonders and phenomena.

Pendulum Harmony

Seeking Wonder!

Scientists are masters of curiosity and wonder. Let's be curious together.

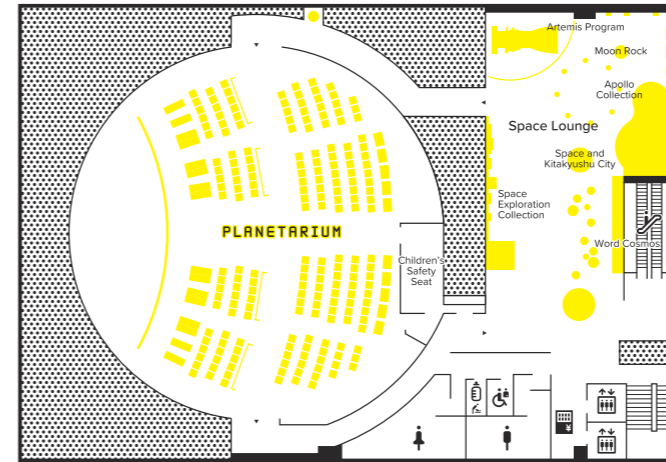

Window of Inspiration!

Theater of Mysteries!

PLANETARIUM 3F

The third floor is a space themed exhibition room featuring a planetarium.

Planetarium

The hybrid planetarium with a dome diameter of 30 meters is a fusion between an optical projector and an all-sky digital projector.

This area is for small children who may cry or make noise during the presentation, or who may be frightened of the dark. Visitors seated here can enjoy the presentation without having to worry about keeping their children quiet.

Space Lounge

Let's explore the universe with valuable materials such as moon rocks and a Apollo command and service module before heading to the planetarium.

Every corner of Space LABO is full of science!

In addition to the exhibition room, there are also other elements of science to enjoy!

Science here and there!

There are scientific facts in every corner of the museum; from the toilets to the staircases to the lockers, and so on. How many science facts can you find?

AR・VR

You can enjoy special videos by accessing the QR code in the hall with your smartphone.

Astronomical Observatory

You can observe astronomical objects on the roof with a large telescope. Apply from our website and enjoy the seasonal starry night sky.
※Open only during events

Kid's Space (1F)

A free space for children to learn about science while playing interactive games. There are also 2 lactation rooms available for nursing mothers in the museum.

SPACE LABO KITAKYUSHU CITY SCIENCE MUSEUM ANNEX

Pre-booking required. About 5 minute walk from Space LABO.

At the Annex, various events such as science crafts, robot programming classes, and large experiment shows are held here. Visitors of all ages are able to have fun with sciences at the Annex.
